

Heat treatment trays and fixtures

Material: heat resistant steel

Process: v-process

Process advantages: low cost, high efficiency

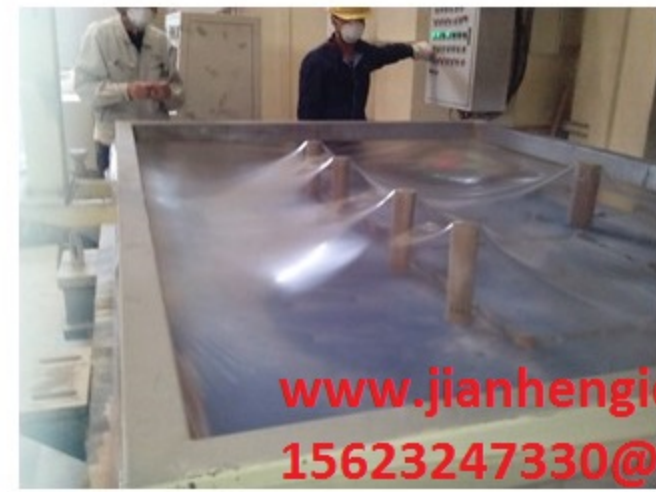

Key technology: composition selection, structure design,
v-process key process control

V-process site

V-process pattern
Material: wood

Covering film

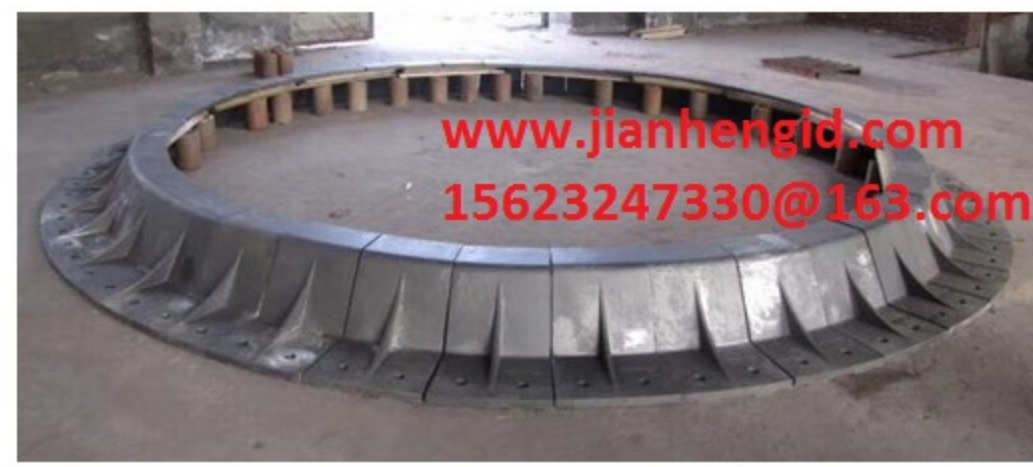

Filling dry sand

Mold

Mould closing

The same equipment and flask are also used in other heat-resistant steel products, which are widely used in power plants, cement plants and so on.
